Projects Summary

SyncTalk - Chat App and Post Sharing Link: [SyncTalk](#)

- Developed a chat application and post-sharing platform using Next.js and Node.js, with Express.js as the backend.
- Users can create posts visible to all, which can be liked, commented on, and shared with friends.
- Real-time chat functionality supports private and group chats, allowing instant communication.
- Users can create and manage groups for chatting with multiple friends simultaneously.
- The platform seamlessly integrates post-sharing and real-time communication for a comprehensive social experience.

Snap note - Cloud notes application Link: [Snapnote](#)

- Developed a notes application platform using Next.js for the frontend and Node.js with Express.js for the backend.
- Notes are stored in an organized folder structure and written in Markdown format, allowing for full formatting and styling.
- Notes can be either public or private:
 - Public notes are accessible to everyone, can be searched by anyone, and include a like feature.
 - Private notes are accessible only to the user who created them.
- The platform includes Google Authentication for user login.

URL Shortener Link: [URL Shortener](#)

- Built using Node.js and Express.js for scalability and reliability.
- Users can convert long URLs into short, shareable links, with the option to use custom short URLs.

Other Projects Link: [Link](#)

- **Portfolio:** Showcasing projects, blogs, and journey, highlighting skills and accomplishments.
- **TaylorSwift API:** Taylor Swift API: Albums, songs, artist insights for engaging apps, websites.
- And Other projects.

Technical Achievements

- Certified in JavaScript and React at HackerRank. [Javascript Reactjs](#)
- Achieved a 3-star rating in Java, Python, and SQL at HackerRank and earned a 2-star rating in C

Education

Echelon Institute Of Technology, Faridabad

Bachelor of Computer Application – Data Science

Nov 2022 – June 2025 (Expected)
